

FREEBIE

DIY reversible Mini Baby Quilt

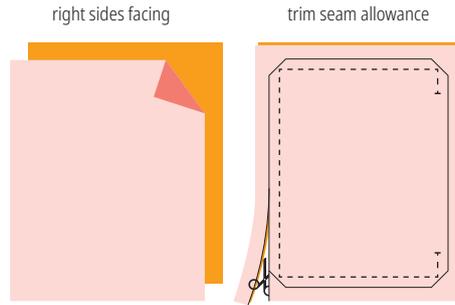

1. Cut out pattern piece 1 and use it to cut out two pieces of fabric.

I used a sweatshirt fabric and a woven cotton. The sweatshirt fabric was a bit thicker, so when quilted I achieved this slightly padded look. If you use two thinner fabrics you might want to consider placing a piece of felt inbetween for the cozy, thick quilt look.

Make sure the fabrics are facing with their right sides on top of each other. If you are using felt padding place that on top of one of the fabrics not inbetween.

2. The pattern includes a 1 cm seam allowance. Sew around the edge but make sure to leave one side open to be able to turn the fabric inside out later.

3. Trim away some of the seam allowance and cut away its corners as shown in the image to the right, to make sure you get sharp corners later.

4. Turn the blanket inside out. With a pen or similar, push out the corners and edges and press the fabric carefully.

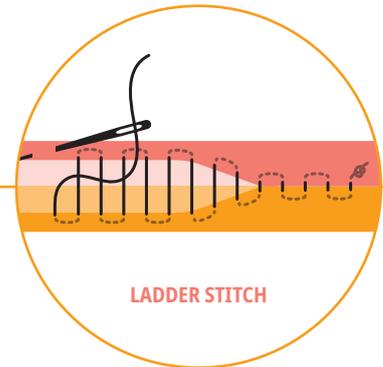

5. Close the opening on the side of the blanket with a ladder stitch. There is a quick illustration of how to do this below but if this is tricky, there are tons of quick and good tutorials online. Or improvise ;)

6. Time to cut out pattern piece 2! Your workpiece should now be about the same size as this pattern. Use a thick needle to poke holes into all of the dots placed at the intersections.

Then place the pattern on top of your workpiece and use a chalk marker or vanishing ink pen to trace these dots onto your fabric. With a ruler connect the dots in the pattern of the design.

Or maybe you have come up with your own fun design? Please share!

7. Carefully sew along the lines of the design, quilting the blanket's layers. Secure you stitches carefully whenever you come to a new starting or end point of a seam.
